## Three Good Reasons

For delivering your Grain to your U.G.G. Elevator

It is owned by Farmers and every dollar of earnings is owned by Farmers.

Experience shows that these farmer-owned elevators give satisfactory service.

The record proves that these farmer-owned elevators have improved grain marketing conditions.

Deliver your Grain to

**UNITED GRAIN GROWERS LTD.**Elevators at Claresholm and Graman  
Use U.G.G. Binder Twine for satisfaction.  
Order at the Elevator.

## THE WALL OF CHINA

In 214 B.C., the Chinese commenced building the Great Wall, which isolated their country from the rest of the world and helped retard their national progress.

The business man who maintains a wall of "dignified reserve" towards the buying public is just as surely retarding his own business growth.

"WHAT WE HAVE WE HOLD"  
MAKE THIS OUR SLOGAN

Now That the Brewery Cup Is  
Back, Let's Make It StayCLARESHOLM'S  
SIGNAL SUCCESS

On Tuesday, July 26th, Claresholm assured herself of the Brewery Cup, the greatest trophy it has been in the custody of Fermie for over 4 years. It was sent to Claresholm to fetch home this trophy to Alberta, and we certainly are hoping that this is only the commencement of a great period of success.

Bill Walker was the who was largely responsible for the winning of the two games that got to Claresholm's credit, but had it not been for the strong play and teamwork of every individual player he may not have pitched Fermie into the discard. The fast and decisive game is reported as follows:

"Blair, the left-handed Ferrie ace, started the game and first inning through Lewis getting off on error after two were down. Tiny Thompson then connected for two bases and an extremely wild throw in gave Claresholm two runs. In the 4th inning, Scotte hit another after a two base hit, scoring an error by Cotton, Ferrie left fielder.

Claresholm's final tally was secured by Ozus, making first on fielder's choice after Walker, who had safely reached base off an error and scored on Carrigan's two bagger. Ferrie's real opportunity was lost in the 7th. Blair reached first on error, was sacrificed to second, and reached third on second error by Siler, but the same lineout by Bishop fell on the same lumber. Siler pulled the hidden ball trick, catching Blair off third. Ferrie's only run was secured by Shrub, who hit for 3 bases and scored when Ozus three wild runs left field to 3rd.

Summary

2 base hits, Carrigan, Thompson and Scott; 3 base hit, Shrub; left on bases, Claresholm 5, Ferrie 5. Stolen base, Thompson; struck out by Walker 4, by Blair 8; hits on Walker 4, on Blair 1.

Mike Frederikson's car was seen resting peacefully in the ditch on Wednesday morning. It seemed that when Mike backed his car from the curb his brakes refused to function and the car skidded into the ditch where it remained tranquilly until pulled out by another car.

Major School and his wife returned to Claresholm Wednesdays evening. They traveled the all Canadian highway from Vancouver. The Major says that the scenery en route is of a most wonderful solemness and awe inspiring grandeur. The road winds its way among the mountains, and at times is very narrow and with tremendous chasms and gorges alongside that it provided a great number of thrills and little danger. It is utterly impossible to imagine the number of tourists on many parts of the road. Major School must have gathered enough data from the trip to provide most interesting material for one of his erudite and famous lectures.

The annual picnic of the Grain Belt S. D. was held at the home of Mr. and Mrs. E. H. M. Walker afternoon. Lunch was served and the remainder of the afternoon was spent in races and games for the children. At the close of the afternoon the teaching teacher, Miss Madeline Boniface, was presented with a watch and a wrist watch by the district. Miss Boniface who has taught at Grain Belt for the past four years, has accepted a position on the Cartmanay staff.

## CLARESHOLM BAKERY

We have received numerous unsolicited compliments on the keeping qualities of our bread, from fishing parties. This is due to the fact that we use only the best ingredients obtainable in our product.

## Brooker's for Quality Bread

## A GOOD BUY

See that section 11 miles east of Parkland, 810 acres needed to wheat on summer fallow, 320 acres summer fallowed. Level as the pavement. No stones. Excellent soil. Good farm buildings. Fences in good repair. Lots of water. Land clean. Crop excellent. Price \$30.00 per acre, \$4,000.00 cash, balance half crop payments, interest 6%.

To see this farm is to want it. Owner wants to go into registered stock raising.

## Irish Free State Making Progress As A Member Of The British Commonwealth

The only tangible bond linking together the members of the British Commonwealth of Nations since the Imperial Conference of 1926 is the "King in the British crown, or the person of the King, but Ireland has other interests, important among them her economic status, which bind her to Britain and the Commonwealth. Thomas J. Smiddy, president of the Irish Free State to the United States, said in a public address at the University of Chicago, Mr. Smiddy delivered one of the Normal Watt Harris lectures on the general subject of the British Empire.

"We have co-operation and no coercion, and the bonds which bind the various nations are intangible," the Irish president said. "We have a symbiotic relationship membership in an association of free nations are bonds which attach or bonds which cause us to be determined by future events."

Anglo-Irish treaty we have been forced to wait out our natural life in our own way without help or hindrance from any outside source whatever."

"We have had to live in a small Great Britain in close sympathy with each other, which geographical contiguity begets for Ireland a relationship to Great Britain more intimate than that of any other member of the commonwealth. This relationship is exemplified economically by the market for Irish commodities. For instance, 95 per cent of the exports of the Irish Free State are consigned to Great Britain and Northern Ireland and 95 per cent of the imports of the Irish Free State are from Great Britain."

Speaking of the progress that has been made by the Irish Free State as an independent member of the commonwealth, Mr. Smiddy said: "If one of the tests of government's ability to insure stability, and to lay the foundations for an economic and cultural life, is what it can do for the average citizen, then it can be said that during the last five years ample justification is to be allowed to govern them selves."

### Stubble Burning

**Found to Be an Economic Operation Under Best of Conditions**

Burnt stubble has been found to be of some value in the destruction of weeds by destroying the seed plants with their seed crops before they have entered the soil. Burning stubble is however, not a good operation when the late type of oil burning is used. Tests at the Swift Current Experimental Station showed that a running fire started with an oil burner can easily be obtained, making the movement of burning very low, but a fire of this kind can be obtained only in heavy stubble, which usually contains few weeds. While stubble is, it is observed, a good fuel, it will not carry continuous fire, which is necessary if the weeds are to be destroyed.

The 1925 report of the Swift Current Experimental Station which can be consulted from the Publications Branch of the Department of Agriculture, Ottawa, gives illustrations of stubble burners which the machine is drawn behind a team of horses which are harnessed to a single axle. The firebox is made of sheet iron and is equipped with parallel grates which slide over the stubble. A small gas engine is belted to a fan supplying air to the burner. The firebox is built into the trailer. A 14 foot machine of this kind will burn from 2 to 3 acres an hour. Three men and four horses are required to keep it going. From 15 to 60 cents per acre was found to be the cost of the labour of men and horses, while the gasoline cost 3 cents an acre.

Parties interested in this machine are to be met before the Station is prepared to make arrangements with respect to its efficiency.

A Stoutsman paid his tax fare and gave the driver a penny for a tip. "What's this?" queried the driver, passing the penny and shouting at his passenger.

"'Tve a spartan,'" said the Stoutsman, beaming at him. "Tails!"

That expression peculiar to Xerx may be contained in the light emitted by glow-worms, is the opinion of some scientists.

Father—"Son your wife decided to leave to drive, too." Sparks—"Yes she won't stop at anything."

W. N. U. 104

### Rapid-Growing Tree Has Been Developed

**Reaches Height of Sixty Feet in Thirty Years**

The voluminous daily newspaper condemned to die for the slaughter of wood-pulp forests, has been reprieved by the development of a tree that will grow to a height of 60 feet in a thickness of 18 inches in 30 years, says the New York Evening Post.

This tree, a hybrid poplar, has been developed by Dr. Ralph McKee of Columbia University and the American Experimental Station at Cornell, N.Y.

The tree is now a summing wood pulp four times as fast as it grows in the forest. The low tree, however, will not compete with native trees for the center of attention because of its need to that of agriculture and because the growing of trees in regular crops as rapidly as they are needed.

The paper obtained from popular pulpwood, said Dr. McKee, is superior to that now generally obtained from spruce. The new trees can be propagated economically by the market for Irish communities. For instance, 95 per cent of the exports of the Irish Free State are consigned to Great Britain and Northern Ireland and 95 per cent of the imports of the Irish Free State are from Great Britain."

Speaking of the progress that has been made by the Irish Free State as an independent member of the commonwealth, Mr. Smiddy said: "If one of the tests of government's ability to insure stability, and to lay the foundations for an economic and cultural life, is what it can do for the average citizen, then it can be said that during the last five years ample justification is to be allowed to govern them selves."

### Horses Return to Birthplace

**Teams Passed Up Two Larier Horses on Journey**

A year after P. M. Ashby, an Edmonton Alberta farmer, bought a pair of mares, he missed his team one morning. The mares were found to be 10 miles away. His owner said they had strayed there but acted at home in the place.

Later it was learned the mares had been sold on the farm to which they were turned loose, and before long, he and every day consumes four cases of apples, eight or nine buckets of milk, two bushels of beans, 16 or 18 pounds of meat, a cabbag and 10 eggs.

## ANSWERS TO LAST WEEK'S QUESTIONS

176. What Migratory Birds Fly Greatest Distances?

Our giant plumes winging their way across the Atlantic are rivalled by many birds. A Canadian Blue-Winged Teal, shot near the mean Lake Ontario, was found in Trinidad 67 days later, 3,000 miles away. The ducks of Nebraska game regions winter in South America. The Arctic tern (a gull) breeds in Southern Greenland, and flies across North America, and in fall wings its bars the angles of the sound wave at the time determines the angle, and the apparatus automatically computes the depth. This mechanism is very accurate, as the velocity of sound in water is 4,800 feet per second. We take soundings in a few minutes that formerly required hours.

177. What Gift of Food Plants Did America Give to the World?

America has given the world its principal food plants. The American Indians were engaged in farming long before the arrival of the white man. Practically every food item by the early explorers was unknown in the old world. They included Indian corn (maize), Irish potatoes, squash, pumpkin, peanuts, tomatoes, the common bean, sweet potato, and tobacco. Columbus and his followers took samples and these back to Europe with them, and they now form the chief sustenance of many peoples in all parts of the world.

178. Do Foreigners Predominate in New York City?

Population in 1920 5,620,048, of which 1,164,434 were native born. In 1920 numbered 2 million, distributed among 41 different nationalities; if we also include their children as "foreign-stock," we have Russian (including Poland 99,142), German 902, Irish 637, Austrian-Hungarian 500, Italian 500, more foreigners of all sorts than the combined populations of Chicago, Boston and Detroit—more Russians than in Moscow, More Italians than in Naples, more Irish than in Dublin.

179. What Is Ptomaine Poisoning?

Milk and some other foods still die to the action of micro-organisms; some of the micro-organisms produce toxins or poisons, to which is due the poisonous action of partly decomposed sausages, tainted meats and other foods which are sometimes inadvertently eaten. Symptoms come on cramps, diarrhoea, headache, prostration, weak pulse, cold hands and feet. First Aid: cause repeated vomiting by giving 3 or 4 glasses of warm water, each containing tea-spoonful of salt, followed by a dose of throat to assist; empty bowels with warm injection soap-suds and water; teaspoonful white kidney in tablespoonful water every half hour. Use hot-water bottles.

180. What Are the Black Hills?

A unique region of forest-clad mountains lying principally in

southeast Dakota, 500 miles to the westward, and 1,000 square miles. Ceded to U. S. by Dakota Indians in 1875. The sunrises rise 2,000 to 3,000 feet above the surrounding plains; the culminating peak, Mt. Harney, altitude 7,240 feet, is the highest mountain between the Rockies and the Sierras. Contains fine roads, picturesque scenery, and surrounded by many points of historic interest to the north "Dark Canyon"; romantic Deadwood; and the Gold Region, producing steadily since the gold rush, 700,000 oz. gold. Wind Cave National Park, and to the east the famous "Bad Lands."

181. Where Is South Dakota State Park?

Embraces the most beautiful part of the Black Hills; covers about 125,000 acres, with a boundary of 20 miles. The first set aside as a game refuge, and retains much of its natural beauty. Contains large herds of buffalo, elk, deer, big horn sheep, Rocky Mountain goats, also wild turkey, partridge, quail, and grouse, and many smaller mammals, including trout. Has excellent highways and trails, modern hotels and tourist camps, an enjoyable and varying climate. The State Lodge, altitude 4,400 feet, in the most beautiful part of the lower ranges, from which one can view large herds of mule game, will be the summer residence of President Coolidge this year.

182. How Does the Hydrophone Measure Ocean Depth?

This device measures the time it takes sound to travel from an oscillator in the aft part of a ship to the sea floor and be reflected back to the receiver located in the forward part of the ship—something like the familiar "V" of the point of the "V" representing the point of the "V" representing the time the sound wave travels, the time determines the angle, and the apparatus automatically computes the depth. This mechanism is very accurate, as the velocity of sound in water is 4,800 feet per second. We take soundings in a few minutes that formerly required hours.

## "ARCADY"

I was feeling incredibly hot and sticky mousing around town, a comparative stranger, wondering what to do and how to do it; something that needed the minimum of energy. I had tried cold drinks, but was not satisfied, so I tracked down my home, and after undressing clung to my back. I followed for a solitary seat on the icy cap of a good high mountain. You know the kind of feeling I mean. Then I met a friend—and God bless him—he almost saved my life.

"Enough?" said he. "Doing anything this afternoon?" he asked. "Only offspring, in cold drink?" I conjured up visions of some picnic I had in before, with your family, swimming, getting dressed (for what's a picnic without a fire?), sitting in the blistering sun in somebody's hammock with your head in the fire, smoke to keep away the mosquitoes, the lesser of two evils. I followed him, I followed him, and his wife.

Preparations were soon made, accompanied by the usual jokes about not forgetting anything. I, of course, contending that I never forgot anything that I ought to. I followed him, and his wife.

# The Wheat Pool Method Is Vindicated by Experience

The fact that the Alberta Wheat Pool has increased its membership by some 14,000 farmers since it was formed, offers strong proof of the success of this farmers' marketing organization. The membership in 1923 was 2500 (in round figures). Today it is approximately 39,000.

## Acknowledge the Pool Has Helped

The stabilizing effect of the operations of the Canadian Wheat Pool in the Wheat Markets of the World is acknowledged by leading Old Country importers, millers and bakers.

Practically all non-Pool farmers admit the Pool has helped and is helping them. There is no good reason why any farmer in Western Canada with grain to sell should not market it through the Pool. Every new Pool recruit adds to the influences of the organization. Business men, professional men and statesmen all testify to the beneficial effects of the operations of the Wheat Pool.

Outside the private dealers in grain, and kindred interests the Wheat Pool has no enemies.

## Is The Pool Not Worthy of Your Support?

No matter what anyone says to the contrary, the Wheat Pool has exerted an upward tendency on prices both in and out of Canada. The Pool has meant fairer dealing to the farmers and a more satisfied and contented countryside. It has meant "better living" for Alberta farmers.

Are these not worthy objects? Has not the achievement of the Wheat Pool been a notable one? Is it not worthy of your active and loyal support?

The Second Series Contracts are now ready.

## "Sign for Safety"

wife's home made lemon essence freshness of the water. We possibly would make a disagreement with our wives over their criteria for food although my wife was very ears into the wood that nestled and of common. My opinion is the river a little lower down was perfectly honest and could cool enchanted place. I felt like when I insisted that the water a boy newly liberated from and the lemon essence would school. Visions of Mark Twain's most certainly not make a good immortal "Swimming Hole" came drink the lady thinking just as we wanted. I wanted to emulate associations of a swimmer again. "Chris Clegg," projected a query "Why?" Shamus Tables and benches were placed, I who had boasted my ed in convenient nooks under the invulnerability in that direction shady trees. There were even had to submit my reason. Head stoves conveniently placed for the hanging dejectedly. I fondly camper or picnicker. Soon was a admitted leaving the better be made available. We were all expected I him. No one said at his meal that we enjoyed exercise, work, not one explosive, not one. Replied I lay hazy even one little look of respect, as on my back, with the mottled far worse was my lot, they shadows falling softly round me, laughed impiously. "Thank you, you have the cor?" Shamus said with host, "or well'd be and his hand. I followed him, and his wife.

"Enough?" said he. "Only offspring, in cold drink?" I conjured up visions of some picnic I had in before, with your family, swimming, getting dressed (for what's a picnic without a fire?), sitting in the blistering sun in somebody's hammock with your head in the fire, smoke to keep away the mosquitoes, the lesser of two evils. ming, splashing, wallowing, I loved the cool refreshing touch of the stream as it descended.

How fortunate are the people of this district are in possessing such a beauty spot so close to them, only those who have had to do without the delights of such a place can truly say so. Though the night was dark, all too dark for me, I must confess, the day was not yet over. Almost overhanging the river, surrounded by tall trees, in this elysian spot spout a dance pavilion on the floor, of which with joyful abandon I followed, dancing, singing, shouting, calling, tantalizing the fest with its rhythmic harmony. A quaint unison trio, they composed the most delightful strains from their wierdly assorted instruments a few instruments, a long-necked guitar, etc., and shawm found me dancing King hospitality held sway and I conjoined with the people present to give to the stranger an extremely happy evening. How sorry was I when the evening ended, yet so happy in the memory of one of the most pleasurable times spent in years. But not the last, for I for one will visit my Acre, as often as possible, knowing that there I shall each time I go, capture the spirit of "The boy just out of school."

## 5000 FACTS ABOUT CANADA

Canada's jubilee year, celebrating the sixty years of Confederation, is fittingly emphasized in the 1927 issue of "5000 Facts about Canada," the famous tabloid cyclopaedia of the Dominion compiled by Frank Yeigh, the well-known Canadian historian and author. It is a tonic to read of our remarkable national progress, as tersely set forth in this unique booklet, under fifty chapters, from "Agriculture" to "Yukon."

The contents are more valuable than the title suggests, being a digest of facts, a sort of a revelation to the reader. No better way of making known our resources, wealth and prospects exists than this publication, and it should have a wide circulation.

## CHURCHES

### UNITED CHURCH

Rev. A. H. Rowe, B. A., of Granum, will preach as the morning service.

12:15—Sunday school.

### Church of the Nazarene

Next door west of the Clareholm Garage.

Full salvation preaching.

11:30 a.m.—Pneumatic.

"How may I know I am a Christian?"

7:30 p.m.—Preaching.

"Some Hindrances to Holiness."

The pastor will preach.

Not only do we invite the people of Clareholm, but those living in the country or likewise invited to meet us in worship from Sabbath to Sabbath.

Weekly services as follows:—  
Tuesday, 8 p.m.—Prayer meeting.

Friday, 8 p.m.—Bible study.

"From time to time with us and we will do the good."

Rev. A. H. Eggleston, B. A., Minister.

## Poor Appetite

### An Asset

Prolongs Life by Preventing People From Overeating

I have spoken of a man, seventy years of age, who was only one of several brothers to live past fifty years of age. Someone asked him what was the reason that he had lived so long. He said, "I have replied, 'You see I always have had a poor appetite.' This was true. His brothers had really been heavy eaters and had died of heart or kidney disease at a very early age of life.

A writer in one of the popular journals tells us that dyspepsia is one of the real blessings of mankind, and lengthens the span of the individual's life ten years or more. Man was given a stomach which is only two or three times as large as is necessary.

"Why?" Because primitive man couldn't figure on three meals a day at regular hours, as can man of to day. He had to go hunting to find his food, and when he ate, he filled him stomach to its full capacity, because he wasn't just sure when he would get his next meal. The trouble with some people today is that they think they should eat until they have filled the stomach, and yet they know that just as sure as four or five hours pass, they will be absolutely certain of another meal, and as a result of this they overeat fairly well, but if Nature rebels then they have to abstain from large meals, or from certain articles of food. They learn to know what agrees with them and thus avoid trouble.

This writer points out that the differences between a dyspeptic and his non-dyspeptic brother is that the dyspeptic has no desire or tends to poison, and one that can tolerate poisons for a long time. The dyspeptic with acute poisoning, and pain, learns not to eat too much and eats only what agrees with him. The non-dyspeptic does not realize that he is poisoning himself because he has no acute pain, and so real damage results to blood vessels and kidneys from his overeating.

Remember that at this time in our history there is no need to overload the stomach.

### Sentinels of the Past

Totem Poles in B.C. to Be Four Centuries Old

Many of the old red-totem poles that now stand as sentinels of the past half-deserted Indian villages along the British Columbia coast are more than four centuries old, say the opinion of Mr. Johnson of the Capilano Timber Company, a prominent lumberman and a student of Indian lore.

While other parts of the habitation disappeared many years ago, two totem poles still stand at the entrance of what was once the tribal headquarters of an Indian tribe at Kyuquot, Vancouver Island, Mr. Johnson says. He adds that the poles were built from giant trees that probably were standing in the days of old prior to the Norman invasion and conquest of Britain for the timber may have been several centuries old when they were cut.

The holes are carved with the customary Indian designs of the period, the figures representing persons and animals and supernature, being believed to be associated with the ancestry of the family to which they were erected.

### Captain Not Always Supreme

Word Not Law When Was Along Said Young Officer

One of the junior officers of a big Atlantic liner was showing an old lady over the ship. She expressed great interest in the stokehold, the cabin and saloon, and was finally taken on the bridge. "Aha," she said, "so this is the bridge. This is where the captain stands, isn't it, and, of course, his word is law?" The young officer, ever ready to dolefully repeat, not to do, he said, "Yes, ma'am, his wife is coming with us this trip."

### Extend Hydro System in Manitoba

Authority to spend \$3,000,000 for extensions to the provincial hydroelectric system in the next four years has been given by the Manitoba government. Contracts for new construction work to the value of \$1,000,000 have recently been awarded by the Manitoba Hydroelectric Commission. Private electric power companies are also making extensions to their power plants in several parts of Manitoba.

"What do you think of evolution?" "Don't fancy the idea; it's too slow."

W. N. U. 1688

## The Armistice Car

Rich American Has Contributed Sum for Purchase of Car

The long-drawn car which served as Marshal Foch's headquarters when he was travelling from point to point during the war, and on the plain green battle table of which the Armistice was signed in a clearing in the forest near Rethondes, has in the past few years stood in the courtyard of the Invalides, where it is exposed to the weather. The paint is peeling to the wood, the leather binding between the planks and some number is now being felt as to whether it will be possible to keep it long in its present situation.

The sale of the carriage offered to take charge of the historic relic and place it in the clearing at Rethondes, where the rails of the military railway still run, on either side of a mounted commemorative plaque. The French government presents difficulties, as when it was taken into the Invalides a pillar and part of a wall had to be removed in order to accommodate it, and the measures would have to be adopted to enable it to leave. Moreover, the military railway over which it travelled to Rethondes has been removed, with the exception of the lines actually used.

The scheme has now again become possible through the generosity of a rich American, who has offered to contribute a sum towards the removal of the carriage, the construction of a short protective canopy from the weather, and the historic railway carriage may return to Rethondes.

### Aid for the Blind

Enter to Improve Their Industrial Condition Should be Supported

Sympathy will be general with the blind people of Canada in their efforts to improve their industrial condition. The blind are entitled to the same degree of vocational conference as the Canadian Federation of the Blind on Saturday to the effect that hundreds of sightless people throughout the Dominion are unemployed for their work in factories and mills. The Canadian Canadien can contemplate with any feeling other than one of indignation that such conditions should exist. It is so obviously adding an artificial to a natural handicap, taking advantage of the disability of the blind, and being ordered to "move along please!"

There is no class in human society that should command more sympathy than that of the blind. Nature gives them certain compensations in the form of keen development of other senses, but it is far after all, a very poor and trifling compensation for the loss of sight. Who blind people equip themselves, despite their handicap, to earn their own living, the ordinary canons of fairplay should be applied to prohibit anything that might suggest discrimination against them.—Montreal Star.

"Yes, I used to be in politics myself. I was dogcatcher in my town for two years, but finally lost my job."

"What was the matter—change of Mayors?"

"None. I finally caught the dog."

The finding of a piece of copper foil at Giza, Egypt, it is said, proves that plumbers of 5,000 years ago used that metal.

## First Draft of Confederation Pact

Facsimile of portion of Sir John A. Macdonald's first rough draft of the British North America Act.

*We at Therefore declare &*

*It shall be lawful for Her  
Majesty with the advice of  
Her Privy Council to declare  
(or to authorize the Governor  
General of British North  
America to declare) by Proclamation  
that the said Province of  
Canada, Nova Scotia and  
New Brunswick upon given  
and after a certain day in  
such Proclamation to be separate,  
which day shall be appointed  
Calculated according  
to the passing of this  
Act. At which time and  
on the last day of December  
of the year of our Lord  
one thousand eight hundred and  
sixty seven the said Province  
shall constitute and be  
one Kingdom under the  
name aforesaid upon, from  
and after the day so appointed  
as aforesaid.*

*The Executive Government  
of the said Provinces  
to and thenceforth to consist in  
the Majority the Queen her  
Heirs and Successors*

### Was Ordered to Move

Prince Had to Okey When Asked to "Move Along Please"

The Prince of Wales had the unusual experience—for him—to be asked to move along when he was being ordered to "move along please!"

He was in the House of Commons engaged in conversation in the Dining Room with the House voted portion of the powers that be closest the lobby of all outsiders, and almost them, grinning broadly, went up to the throne.

His Royal Highness' sense of humor must have been high when he said that of his grandfather, King Edward, who did not, as is well known, see the point of any joke, practical otherwise, which affected him.

It is on record that once,

Prince of Wales, he was in the Gallery of the House when an Irish member exploded him and immediately proceeded that others were present and that he, within a few moments, had to leave the gallery.

The speaker had no option but to give the order and the Prince had to leave, but although he affected unconcern, he was in fair fury, angry.

A "chemical sponge" has been made to absorb food odors and gases in refrigerators and pantries.

### Proposed New Pulp Mill

Projected Industry on the Nelson River in Manitoba

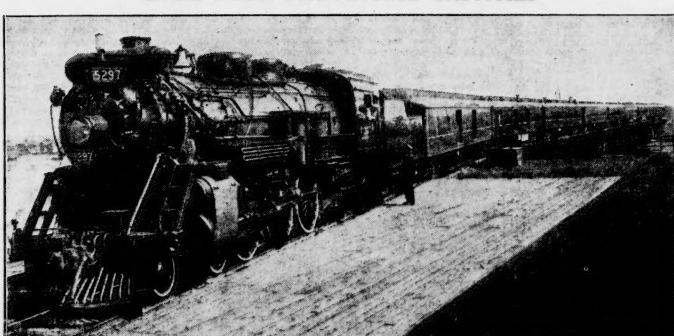

A new chapter in the development of the wood-pulp industry in Manitoba is about to open when an application is made to the Department of the Interior from a group of Canadian and United States capitalists for a proposed mill on the Nelson River, which is estimated to require the erection of a mill with a capacity of 400 tons of newsprint per day. The application does not state the cordage required, but on the basis of the Nelson Pulp and Paper Company's capacity of 1,000,000 pounds of pulpwood, an investment of \$100,000, a payroll of upwards of 2,000 men. This is the largest newspaper development ever planned for Manitoba.

Saskatchewan Livestock Pool

Arrangements completed by the directors of the Saskatchewan Livestock Pool at a meeting in Regina provide that Saskatchewan should handle most of the Jaw and Northern shipments at Prince Albert. Since February 1, 1938, contracts have been received.

It requires six pounds of good cork to make a reliable life preserver.

## LINKS FOUR PROVINCIAL CAPITALS

The photograph shows the Confederation, the new fast train of the Canadian National Railways, which went into service between Toronto and Vancouver on June 24 westbound, and June 27 eastbound. It operates via

Winnipeg, Brandon, Regina, Saskatoon and Edmonton. The first westbound train carried a party of newspapermen from the prairie provinces to Vancouver and the Pacific coast newspapermen will be all represented on the return trip as far as Winnipeg.

## CLARESHOLM FARMERS INTERVIEW MINISTER OF THE INTERIOR

G. B. Walker, G. H. Carney, T. C. Mifflin, J. M. Soly, S. Wyatt, A. Amundsen, N. Thompson, J. L. Salmon and others, the delegation representing the Claresholm farmers, voiced their protests against the Power's company's running transmission lines over their lands, to the Hon. Mr. Stewart, Federal Minister of the Interior, on Saturday morning last.

The farmers asked that regulations compelling power transmission lines to follow road allowances only should be enacted. A series of poles strung across their land depreciated their value considerably. It made it more difficult to work the land adequately and economically. Besides it granted a right-of-way precedent that anyone believing in the precept that "A Britisher's home is cast" must naturally oppose.

In reply the Hon. Mr. Stewart stated that in his opinion this Would Make More Cost to the Company.

The Hon. Mr. Stewart was of the opinion that the enactment of such a law as this would appreciably increase the production cost of power to the companies, and therefore pro rate to the consumers. In result, if such a change of regulation were instituted in Alberta, this Province would be unable to compete fairly with the other provinces where right-of-way air lines are permitted. It would not be likely to start working for a new site and change without strong indication from the majority of the Province of Alberta. I recommend to this delegation that they and the company in question get together and try to arrive at some suitable arrangement.

Mr. Soly stated that the delegation were certainly not satisfied with this arrangement but would continue to do their best to further, what he considered were, the best interests of the community at large.

## U. F. A. WILL HOLD PICNIC

The Willow Creek U. F. A. No. 365 are holding a big picnic on Friday, August 5th, at Sharldes' grove.

Basket lunch at noon.

Children's races at 1:30 p.m.

Baseball at 2:30 p.m.

Speakers - G. H. Walker at 4 p.m., ad probably Mrs. Parfley.

Dance at Northern Light school house at 9 p.m.

Refreshment stand will be on the grounds.

Come one, come all.

## CLARESHOLM HORSE WINS AT STAVELY

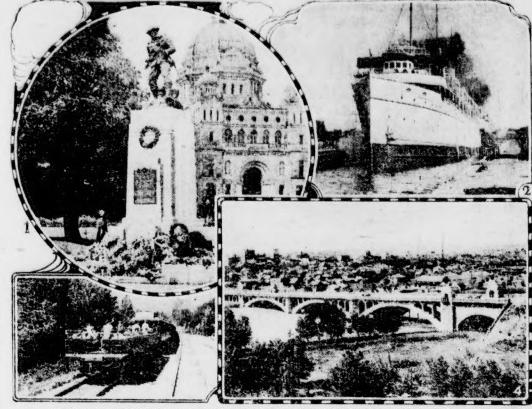

Watt's Balcarroch Fox won the mile dash by a length from Kipping's Challenger and Meyers' Jessie Guard, finishing freely in old style. Both Challenger and Jessie Guard came from the line side of the track, but after a quarter Fox's rider used his judgment and took him back off the pace, allowing Jessie Guard to even with Challenger. The finish dropped the front of the horse stretch. Amid great excitement and enthusiasm the Fox, three lengths behind, settled for a come-away and catching the others 100 yards from the post fetched home the bacon by a long length.

Kipping was compensated by winning the half mile and three-eighths dashes with Sink or Swim Moran's Twister being second each time. The pony race fell to Armstrong's Comet, a well earned victory.

These horses have all run at Claresholm and consequently proved great interest to local racing fans.

The Stampede was admirably staged and after the passing smoothly and expeditiously, and much excitement prevailed, and an entirely satisfactory day was obtained. The dance at Bruder's hall held in the evening was an immense success, everyone cooperating in the attainment of the maximum of enjoyment.

## Canadian Teachers Tour Canada

1. Parliament Buildings, Victoria. 2. C.P.R. Great Lakes steamer taking through at Sault Ste. Marie. 3. Open air

showground near Fredericton, New Brunswick.

That a thorough personal knowledge of every section of the Dominion is a necessary part of the education of the Canadian teacher, is the opinion of the Royal Canadian Teachers' Association.

A tour of the Dominion by the Canadian Pacific lines this summer headed by Professor Stanley Ward, Dean of the Faculty of Education, McGill College, has been a success.

Dean Ward's tours have become widely popular during the past year. They have been conducted by the coming 21-day trip to the west, Dean Ward said.

During the first week of the tour, the party will be in the West, starting July 23, where several days are spent. Motor rides to many of the beauty spots in the vicinity, especially Banff, are included.

Dean Ward's tours have become widely popular during the past year. They have been conducted by the coming 21-day trip to the west, Dean Ward said.
